THE TRUE LEGEND OF A WHALER LIES IN THE POTENTIAL IT UNLOCKS.

LIVE MOMENTS

WORTH SHARING

EXCEPTIONAL QUALITY & RELIABILITY

FOR UNCOMPLICATED ENJOYMENT

Boston Whaler crafts the safest, easiest to own, most exciting boats on the water. For more than 60 years, Whaler has delivered exceptional quality and reliability, wrapped in peerless designs that meet the diverse needs of modern boaters. Every Boston Whaler is precision-engineered and impeccably constructed to bring you maximum comfort, enjoyment and reliability.

Generations of boaters are familiar with Boston Whaler as the Unsinkable Legend™. It began with founder Richard Fisher's inspired new construction method, devising a foam-injected hull that literally would not sink — not even after being sawed in half! *LIFE* magazine documented the triumph, and the legend was born.

Whaler's lineup has continually evolved to meet boaters' changing preferences, gaining new series including (clockwise from top left) the first Dauntless, Conquest and Outrage models.

Each new Whaler model — like this year's 240 Vantage — redefines the limits of what's possible, shaping the market with inventive solutions that make boat ownership easier and more fun.

That spirit continues today, in a storied lineup of boats ranging from 13 to 42 feet. Recently, a 45,000-square-foot technology center was established on Boston Whaler's campus, home to the industry's most formidable boat product development, engineering and design teams. This Brunswick Boat Group Technology Center (BBGTC) keeps Fisher's vision alive and well, focusing on new advances including boat construction methods and materials, electronic technologies, connectivity, autonomy and more — all working together to make boating better and easier.

The ultimate goal for every Boston Whaler is to provide a boating experience that feels like second nature. Features and options are purposefully chosen; layouts have an innate logic; performance and handling are precise and predictable. Whalers are designed to be lower-maintenance, meaning more time on the water. When you purchase a Whaler, you can count on uncomplicated enjoyment from a boat built to last.

BRUNSWICK | **BOAT GROUP**
TECHNOLOGY CENTER

DEDICATED TO THE CRAFT

FOSTERING TEAMWORK AND INSPIRATION

Behind every Boston Whaler is a group of talented, passionate employees working together to deliver the best quality boats on the water. The company fosters a culture of teamwork and collaboration in which employees are encouraged to ask questions and challenge each other.

“Boston Whaler is a leader in the industry because of the talent of the people in our organization. We believe every employee should be given the tools and encouragement to grow their expertise.”

— Bruce Schoenhofer,
Vice President of Operations

New hires are mentored throughout their first years with the company; longtime employees are rewarded for continuing to broaden and deepen their skillsets. Each new boat model is assigned a “core team,” comprised of a staff member from every department, to spearhead the development and launch.

Fundamentally, boatbuilding is as much a craft as it is a job. Producing the finest boats on the water requires not just precision and technical ability but also passion and curiosity. Incorporating different viewpoints and areas of expertise strengthens the finished product.

It’s a difference you will feel: the result of a six-decade commitment to innovation, teamwork and excellence that only grows stronger with each passing year.

Visit bostonwhaler.com/the-unsinkable-legend/ for more info on our company and our passion.

HONORING THE VOICE OF THE CUSTOMER

DESIGN PHILOSOPHY

The process of making quality boats begins with listening to actual boaters. The BBGTC team conducts extensive Voice of the Customer research, gathering feedback from owners and dealers. This feedback leads to insights that help shape the development of each new model and innovation.

And if a solution doesn't exist, Whaler creates its own: The company holds patents for a variety of systems and features — including the Multi-Position Lounge found on every Vantage model, the swim patio on the 270 Dauntless, the Dauntless family's All-Activity Tower option, and more — and continues to seek new and better ways to serve its boating family.

When adventure calls, count on Boston Whaler to take you there and expand the possibilities. Whether you enjoy heading offshore in search of gamefish, wakeboarding or tubing around a lake, entertaining family and friends, or cruising until dusk and then sleeping onboard, there is a Whaler model perfectly suited to the activity. Incredible comfort, capability, reliability and ease of use always come standard.

Visit bostonwhaler.com/the-unsinkable-legend/boat-design for more info on our research and design process.

THE HEART OF THE VESSEL

MANUFACTURING & THE UNIBOND CONSTRUCTION METHOD

The Boston Whaler difference is apparent from the moment you step aboard. Whaler's hulls are precision-engineered to anticipate and harness the forces of water, balancing stability and softness to produce a smooth, dry ride.

*(Left) Over the years, Whaler has occasionally gone to extremes to prove the strength of its boats' construction.
(Below) Technicians align the two halves of a hull before injecting a proprietary foam solution.*

Boston Whaler backs every boat with a 10-year structural hull warranty and a 3-year, bow-to-stern limited warranty on components.

At the heart of every Whaler is the exclusive Unibond™ construction process. Whaler uses a proprietary closed-cell, environmentally friendly foam, injected between the hull's inner and outer liners — not just below the waterline but up the sides, as well — to create a single, solid unit. This not only results in the boats' unsinkability, but also contributes greatly to ride quality.

Further, every Whaler is put through rigorous testing and in-depth stability analysis to ensure superior performance. The design, manufacturing and engineering teams work closely in tandem to adapt and refine. Tolerances become more precise, efficiencies increase and the boats reflect the true power of teamwork.

Visit bostonwhaler.com/the-unsinkable-legend/boat-design for videos and more info on our build process.

EYES ON THE HORIZON

THE ROLE OF TECHNOLOGY

Embracing new technology has always been a part of Whaler's DNA. Ever-evolving, technology continues to produce conveniences and capabilities that previous generations hadn't thought possible. Brunswick and Boston Whaler invest in innovations that simplify and improve the boating experience, both on and off the water.

Notable breakthrough features found on select Whaler models include:

Visit bostonwhaler.com for videos, photo galleries, and more info on the complete product lineup.

Mercury® engines with Joystick Piloting and Skyhook functionality, for effortless station-holding and easier docking.

Raymarine® multifunction navigation systems and high-resolution displays, for sophisticated, blazing-fast performance.

JL Audio® marine sound systems and amplifiers, whose highly efficient speakers deliver crystal-clear sound quality.

Seakeeper® gyro-stabilization technology, which virtually eliminates boat roll, dramatically cutting down on the type of movements that can cause seasickness.

Attwood® bilge and aerator pumps integrate the highest quality components for unsurpassed durability and efficiency.

Whaler Watch, hosted by **Faria Beede**, uses telematics technology with cellular and satellite connectivity to provide remote visibility and control of some systems. Whaler Watch keeps tabs on critical boat functions and provides geo-fence capability via smartphone app. Paired with Mercury's Theft Deterrent System (TDS), Whaler Watch can restrict engine performance when the key fob is not in place.

NAUTIC-ON™ remote-monitoring capabilities employ cellular technology to convey vital systems data and boat location via a convenient app, for added peace of mind.

Auto Glide, an automatic boat leveling system that uses sophisticated accelerometers, gyroscopes and software to keep the boat level at all times regardless of cruising speeds.

POWERFUL PARTNERSHIPS

PAIRING WITH THE BEST IN THE FIELD

Every Boston Whaler comes equipped with state-of-the-art Mercury® propulsion, precisely power-matched to each boat. An industry leader in its own right, Mercury delivers superior performance and continues to challenge the limits of possibility. In fact, Whaler's designers and engineers work closely with Mercury's team throughout the development, manufacturing and testing phases to ensure a seamless interaction between boat and engine.

Every Mercury engine is backed by a 3-year corrosion warranty.

In addition to its role in forming the Brunswick Boat Group Technology Center, Boston Whaler's parent company, the Brunswick Corporation, has long provided support and investment. Through its Brunswick Commercial and Government Products (BCGP) department, Boston Whaler also produces boats for government agencies, military forces and commercial entities around the world, applying its expertise in building ultra-reliable, purpose-driven boats that always rise to the task.

In addition, Boston Whaler enjoys partnerships with the best component manufacturers in the industry, offering features including JL Audio® systems, SureShade® sunshades, Raymarine® navigation equipment, Seakeeper® gyro-stabilization systems, Sunbrella® canvas and many others.

Visit bostonwhaler.com for videos, photo galleries, and more info on the complete product lineup.

WHALER LIFE

THE OWNERSHIP EXPERIENCE

One of the best aspects of boating is the sense of belonging it can provide. When you purchase a Whaler, you become part of a vibrant community. Boston Whaler works to foster camaraderie with events and initiatives that put owners front and center, including local gatherings and annual excursions to amazing places like Bimini and the Abacos.

From beach games and barbecues to offshore fishing tournaments and flotillas, these events are a perfect chance to make friends with fellow owners and enjoy the great outdoors together.

Even when you're not on the water, Whaler offers many ways to stay immersed in the lifestyle. Online, boaters can engage with Whaler through Facebook, Instagram, Twitter, LinkedIn and YouTube, and can sign up to receive the bimonthly Navigator e-newsletter.

A NETWORK OF SUPPORT

WORLD-CLASS CUSTOMER SERVICE

Boston Whaler partners with a global network of exceptional dealers to provide a level of customer service that is unsurpassed. All around the world, Whaler's dealers offer hands-on training, thoughtful guidance, expert boat care and maintenance, and so much more. Count on their vast industry experience and deep boating knowledge, matched by a commitment to enhancing your enjoyment.

This track record for stellar customer service has earned Boston Whaler a Customer Satisfaction Index Award from the National Marine Manufacturers Association for 17 straight years. You always have a place to turn for boating support and answers.

And for added peace of mind, every new Boston Whaler owner receives a free 95-day Sea Care membership, giving you 24/7/365 access to Sea Tow's experienced captains, just in case the unexpected happens. As a Whaler owner, you have an arsenal of tools and resources at your fingertips.

AWARDS AND ACCOLADES

LEGENDARY QUALITY FOR EVERY BOATING ACTIVITY

Boston Whaler has an unmatched commitment to delivering the safest, most reliable and most stunning boats on the water. As a result, the company has earned numerous awards for innovation, quality and customer service, including:

THE UNSINKABLE LINEUP

LEGENDARY QUALITY FOR EVERY BOATING ACTIVITY

Outrage

Super Sport *page 22*

Easy to operate and easy to love, the Super Sport models are designed for load-and-go readiness.

Montauk® *page 23*

Classic heritage and timeless style meet cutting-edge capability in every tried-and-true Montauk.

Dauntless® *page 24*

The Dauntless models — including the new 220 and 250 Dauntless — boast impressive performance, spacious center console layouts and multitasking capabilities galore.

Vantage® *page 25*

Every Vantage model features a uniquely convertible dual-console layout, providing ultimate comfort and versatility.

Conquest® *page 26*

The rugged Conquest models rise to any occasion, combining professional-grade fishing features with luxurious onboard comfort.

Realm® *page 28*

Defining “Expedition Grade” quality, the Realm series draws from the best aspects of center console and cabin cruiser models to deliver unforgettable on-water experiences.

Outrage® *page 29*

Enjoy smooth offshore performance, huge fishing capability and effortless entertaining with the bold Outrage series.
